GRAFTING.—Divide the stitches equally on two needles, with the wool at one end and with the right side of the work facing. Break off the wool, leaving a length of several inches, and thread this with a wool needle. * Inserting the wool needle, as if for knitting, into the first stitch of the front needle, draw it through the stitch and slip the latter off the needle; inserting the needle, as if for purling, into the second stitch of the front needle, draw the wool through and let the stitch remain on the needle; taking the wool under the front needle and inserting the wool needle, as if for purling, into the first stitch of the back needle, draw the wool through this stitch and slip the latter off the needle; inserting the needle, as if for knitting, into the second stitch of the back needle, draw the wool through and let the stitch remain on the needle; bring the wool forward under the needle and repeat from * until all the stitches are worked off, darning in the end of the wool securely when finished.

SPLICING.—When joining the wool, split the two ends and, removing half of the number of strands from each for several inches, lay the wools together, the two ends pointing in opposite directions, and knit 6 or 8 stitches, afterwards continuing with the new thread of wool.

SOME IMPORTANT INFORMATION

Avoid disappointment—buy the wool recommended. Buy wisely—buy enough—the same blend cannot be repeated.

TENSION is the number of stitches in width to measure one inch. On this depends the success of the finished article. If the tension is not obtainable on the needles recommended, use a size finer or coarser, as required.
